Bio

A mathematician and developer exploring boundaries between abstraction and experience. I build systems where logic finds shape and structure meets design.

Skills

- TypeScript
 - React
 - Next.js
 - Astro
 - Vite
 - HTML5 & CSS
 - PostCSS and Sass
-
- Git
 - AWS
 - Docker
 - Postgres
 - Redis
 - Drizzle
 - Prisma
 - Elysia.js
 - tRPC
 - Bash
 - PHP
-
- LaTeX and KaTeX
 - Mathematical Modelling
 - Python
-
- Logo Design
 - Web Design
 - Mobile Design
 - UI Design
 - Figma

Experience

Paradise Circus Inc.

December 2025 — Present
New York, United States · Remote

Senior Lead Engineer

Took over an incomplete, non-functional email platform [fuck.it] at Paradise Circus Inc. and turned it into a production-ready system. Progressively assumed full ownership, becoming the sole engineer responsible for development and operations. Rebuilt the entire stack and established reliable deployment workflows, helping more than triple the platform’s revenue.

Freelance

2021 — 2023
Remote

Full Stack Developer

I have worked on various different projects during my university years. Click one of the following items to preview some of my featured works.

Education

Middle East Technical University

Bachelor of Science, Mathematics
2019 — 2026

Nesin Mathematics Village

2020 — 2021

Other Skills

- Team Management and leadership
 - Prototyping
 - Customer Journey Mapping
 - Conversion Rate Optimization
 - A/B testing
 - Technical SEO
 - Data-driven decision making
 - Generating unconventional solutions
 - Connecting ideas across various domains
-
- Reading and understanding technical papers
 - Advanced problem solving
 - Mathematical modelling
 - Abstract reasoning and formal logic
 - Algorithm design and optimization
 - Data analysis and interpretation
-
- Systems-level design thinking
 - Balancing aesthetics with functionality
 - Visual clarity and minimalism
-
- Writing poems and songs in English

Hobbies

- Studying mathematics and the some
- Trying to invent new theoretical models of computation
- Watching a lot of movies
- Reading philosophy and science-fiction
- Playing chess and other board games with friends excluding Sid Meier's Civilization; I hate that game
- Karaoke

Languages

- Turkish — Native
- English — Bilingual Proficiency

Socials

- linkedin.com/in/omer-mert-coskun

Projects

Anatolia: 19th Century

anatolia19.metu.edu.tr
2022 — Present

Cofounder and Developer

Digitalization of 19th Century Anatolia via various resources in French, Ottoman and English. I have designed and coded the entire website and hosted it on the university's official domain and servers.

The project is actively used by numerous researchers around the world composed of mostly historians and has more than 4k academic followers [on X](#).

attestationletter.com

attestationletter.com
April 2026

Founder

100% client-side various attestation letters generator.

notes.howion.com

notes.howion.com
2025 — Present

Author

My personal wiki and note system built with Astro and Markdown featuring growing collection of notes on various topics with diverse visitors around the world.

Other Work

lambert-w-function

[GitHub](#)
July 2019

Efficient JavaScript implementations for the Lambert W function on the principal branch with 2k+ consistent downloads per month.

HUID Specification and Implementation

[Specification](#) · [Implementation](#)
March 2026

I have invented Snowflake-like identifier called Howion's Unique IDentifier and wrote a RFC-like specification for it. Moreover also implemented in TypeScript with extensive tests.

Hackathons

RevenueCat Shipyard

[Our RemindNow Submission](#)
February 2026

Backend and Mobile Design

In a team of two joined to the [RevenueCat Shipyard](#) hackathon in which I have developed and enterprise-grade backend and designed the mobile app. My friend natively coded it into iOS via Swift.
